FINfloor

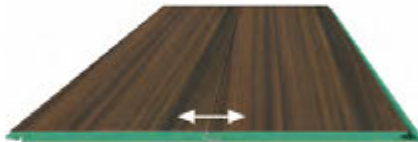

the easiest and most resistant installation system

EASY AND RESISTANT

Easy to install and with a long service life

FINfloor incorporates the most modern and prestigious installation system available in the market, without the need for adhesives or glue. Simply line one section up with another and thanks to its 'click' system, this flooring is extremely easy to install. The time needed to install this flooring has been drastically reduced thanks to this 'click' system, manufactured in accordance with patents EP 0843763 and US 6006486.

Resistance

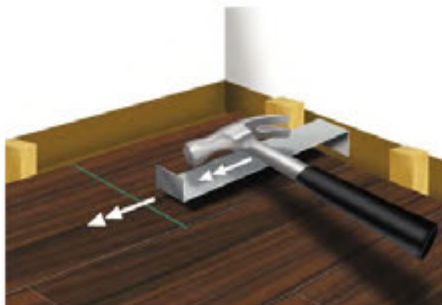

FINfloor's CLIC anchoring system and the high-precision machine work make sure that planks do not separate from each other thanks to their high tensile strength.

Protection

The paraffin covering the entire profile protects your floor against humidity. Moreover, this **edge sealing** also serves to reduce the unpleasant noise produced by friction. The use of a moisture-resistant support provides greater dimensional stability to the entire set.

HORIZONTAL INSTALLATION

Horizontal installation

Finfloor allows installation without need to lift the boards at an angle (angle-snap fitting), which makes the fitting of the final boards of an installation much easier.

Easy installation
Manufactured using technology
protected by
EP 0 843 763 y US 6 006 486

Does not lose its colour with light

High resistance to wear and tear

Non-allergenic

features

HYDRO PROTECT

FINfloor has a high resistance through its moisture¹ technology HYDRO PROTECT:

- High density wood fiber support, made with special resins that provide improved dimensional stability.
- Sealing of edges. The perimeter of each plank has been coated with paraffin to protect the penetration of moisture.
- High precision and resistance glueless click system, preventing from leakings.

¹ FINfloor is not suitable for outdoor installation, or any other environment with a high level of humidity such as kitchens, bathrooms or laundries.

FIRE RESISTANCE

Certified by accredited independent organisations as Euroclass Bfl-s1 (in accordance with EN13501-1). Developed specifically for high risk spaces, in accordance with the requirements of European's Technical Buildings Code.

¹ Except CLASSICS range, which is classified as Cf1

ANTISTATIC

A special treatment is used to reduce the build-up of static electricity and therefore the occurrence of electric shocks.

Particularly suitable for commercial properties and offices. This innovative technology significantly improves one of the major drawbacks of many types of flooring.

Anti-static classification <2kv in accordance with EN1815.

CLASS OF USE AND RESISTANCE TO ABRASION

FINfloor is recommended for heavy domestic use and/or general commercial use.

We have also improved surface resistance to abrasion and wear, reaching the level AC5¹.

These two features make FINfloor a laminate flooring you can install with all the guarantees in both home and commercial.

¹ Except CLASSICS range, which is classified as AC4

Resistant to cigarette burns

Easy to clean

Accessories

For a complete installation, we also offer our full range of original skirting boards and profiles whose tones perfectly match each floor design. Manufactured with a **water-resistant** support for greater resistance against humidity.

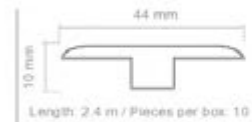

The profiles for horizontal application are subjected to greater wear and tear due to friction and stepping. Thus, they are manufactured with laminate, for high **resistance to wear and tear**.

PROFILE

EXPANSION

Profile for joining same-level flooring.

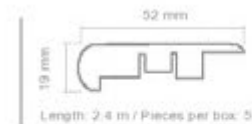

⚠ Since laminate flooring is made of wood fibers, it needs expansion / contraction joints. The size of expansion profiles is vital in all doorways to enable the free movement of flooring floors.

STAIRS

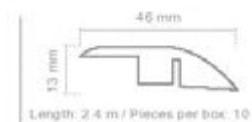

Profile for stair end.

TRANSITION

Transition profile between floors with different levels (e.g. parquet, ceramics, carpets...)

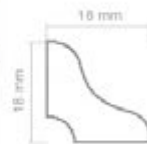

SKIRTING BOARDS

SCOTIA

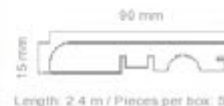

Low skirting for applications in which the height of standard 70 or 90 skirting is excessive. E.g.: Meeting points with cupboard sliding doors, galleries, doors, window doors, with the skirt boards of certain pieces of furniture, etc...

FLAT SKIRTING

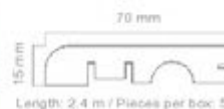

Modern lines skirting with a cables channel available in 9 cm.

FLAT SKIRTING

Modern lines skirting with a cables channel available in 7 cm.

SILENT FINFLOOR

1 m roll (xw), 25 x 1

Specifically developed to improve the feeling of comfort when stepping on your Finfloor floor. Drastically lowers the level of noise generated in the house, besides complying with all requirements for noise transmission to the floor below. Additionally, this underlay is specifically recommended for installations with radiant heating, due to its ability to transfer heat and as a barrier against humidity thanks to the insulating polyethylene film that comes with it. These performances are further complemented by exceptional resistance against perforation and compression, which makes this underlay an ideal complement for your installation and to ensure the end result of your Finfloor.

Cleaning instructions

✓ RECOMMENDED

Use a broom, a dust mop, a vacuum cleaner with a parquet brush, or a dry mop.

Use pH-neutral, non-abrasive detergents.

Use only recommended products.

Use a vacuum cleaner with a parquet brush to clean grooved products. If this is not enough, then use a slightly damp cloth.

If any water is spilled, dry it out immediately. Avoid any stagnation of liquids.

To remove any tough stains upon the surface (**NEVER** in joints or grooves), use slightly diluted acetone or alcohol for household use. Then, clean with water.

Special care must be taken in pets' sleeping areas. (Urine may damage the floor. Try to avoid it and clean it immediately).

✗ NOT RECOMMENDED

Never use abrasive accessories (steel wool, pan scrubs, etc.) or cleaning machines.

Wax and other wooden floor or furniture cleaning or shining products are not suitable for this product.

Never use or introduce any sharp objects, or any abrasive, cutting or humid products, etc. into the joints.

A LEGACY OF TRUST

Natural Wood & Veneers - Kochi

Established in 1977, Jalaram Timber Depot started with a simple mission -- to preserve the quality and craft in harvesting the finest wood from around the world and to bring it to India in its most suitable form to find a place in your home or work environment.

Today we are proud to have over 40 years of expertise across not just veneers, but also wooden flooring, plywood and solid surfaces. Jalaram Timber Depot has consistently set the standard for these products in India and we're happy to say that we continue to do so every day.

Our extensive range of veneers are closely evaluated and curated from around the world, using the best of local materials as well as international woods.

Much like timber that needs the best conditions to grow, we have nurtured strong relationships and built a reputable network of timber suppliers across the globe, which gives us access to the highest quality of materials.

We also lead the market in solid surfaces -- Jalaram Timber Depot was the first to introduce Dupont™ Corian® Solid Surface in India, among several other brands that we are proud to partner with.

We are the authorized distributor for the Western Region for Parador -- a premium wooden flooring brand from Germany. Our plywood range is curated and certified; any brand endorsed by Jalaram Timber Depot meets the top quality standards since we go through stringent testing processes and set the quality bar for the industry.

Natural Wood & Veneers - Kochi

Jalaram Timber Depot has its own veneer manufacturing unit in Kerala with over 400 varieties of veneers, which allows us to monitor and maintain a certain level of quality.

Spread over 6 acres at Vettickal, Mulanthuruthy in Ernakulam District, our state-of-the-art factory is equipped with a fully fledged slicing and peeling facility and kiln drying chambers.

The factory also houses our showroom that carries a large variety of wood, veneers and flooring products.

The Veneer Studio at Central Mumbai is designed to showcase our collection of veneers, floorings, solid surfaces, deck & cladding, kiln dried timber, live tree slabs and plywood. We're ready to welcome you.
